

ASSET METADATA & IDENTIFICATION

ASSET / CLUSTER	CANONICAL HOSTNAME	STATUS	CONFIDENCE
CLUSTER-001	WEB-SRV-01	CORRELATED	96%

1 | INVESTIGATION CONTEXT

Analyst Question:

What evidence supports this correlation?

2 | AI-GENERATED EXPLANATION

Correlation is based on MAC and serial number match.

EVIDENCE PRESENTATION

CATEGORY	EVIDENCE	ENGINE REFERENCE	WEIGHT
Strong	MAC Match	sig-ref-101	+50
Strong	Serial Match	sig-ref-102	+45

3 | DETERMINISTIC ENGINE GROUND TRUTH

FIELD	AUTHORITATIVE VALUE
Correlation status	CORRELATED
Confidence	96%
Matched signals	0
Conflict count	0
Member records	None reported
Conflicting attributes	None reported

4 | INTERPRETATION

The correlation is supported by strong supporting evidence across hardware, cloud, and agent identifiers. The deterministic VulnFusion engine remains authoritative for asset identity and confidence calculations.

5 | LIMITATIONS

This brief is bounded by the supplied payload. No external validation of source-scanner findings, cloud infrastructure, or network configuration was performed. AI-generated content is explanatory only.

6 | EVIDENCE REFERENCES

#	Evidence Reference
01	MAC Match
02	Serial Match

7 | AUTHORITY & PROVENANCE

PROVIDER	MODEL	GENERATED
gemini	gemini-1.5-flash	Mon, 28 Sep 2026 05:58:42 GMT

AUTHORITY BOUNDARY

Deterministic correlation results are authoritative. AI-generated content is explanatory only and does not determine:

- asset identity
- correlation status
- finding identity
- exceptions
- security metrics

Synthetic demonstration data only. Qualys, Tenable, Rapid7, and Wiz are source labels used for demonstration.
